

Street Light Poles

Embedded Style

DesignPole offers pre-stressed concrete poles that are spun-cast with natural aggregates and then polished into a marble-like column. Our poles are naturally graffiti-resistant and tape-resistant. The streetlight poles are very durable and have the highest EPA and wind load ratings for concrete poles. DesignPole products are versatile and resemble high-end terrazzo or limestone. Base mounted or embedded (direct burial) installations are available and can also accommodate mast arms, post top arms, or side mounted lighting fixtures. DesignPole is virtually maintenance-free and provide a quality-designed product for any streetscape.
